

Welcome to Project Blaster

Video Transcript

Welcome to Project Blaster, the tool that will help you make a really exciting classroom project.

Whether you want to learn about an important scientific discovery or explore the life and work of a great artist or musician, Project Blaster can help. In fact, your project can be about any subject you like from Outer space to the history of biscuits...

No matter where you want to go with your project, Project Blaster will show you how to explore the world around you and search for useful information – just like a detective. Project Blaster works by guiding you through six project stages, like stepping stones in a journey of discovery and creativity.

What am I going to do? In this stage Project Blaster helps you decide on the topic of your project. It also helps you decide on your goals.

What am I looking for? How do I do research? Project Blaster shows you how to find things out for yourself.

Where do I look? Project Blaster helps you to identify the information you need for your project.

How do I gather and record information? There's a lot to remember when it comes to gathering useful information. But Project Blaster helps make it easy.

How do I select the information I need? Project Blaster helps you select the bits you need to create something of your own, whether individually or in groups.

And you can go back to an earlier stage of the project at any time if you feel you need to do more work there. Blast Off! You've found all the information you need. You're just like a rocket builder who has all the pieces they require. Now it's time to build it and blast off! Project Blaster will help you finish the job.
